Geospatial Abduction

Principles and Practice

- Provides the mathematics underlying geospatial abduction and the algorithms to solve them in practice
- Offers wide applicability in many different fields for practitioners and researchers
- Includes several lively, real-world examples that will explain the material very clearly to a reader
- Includes a web site dedicated to geospatial abduction, hosted at University of Maryland. In addition, the authors will record video lectures (30-60 minutes each) devoted to each chapter, as well as slides on each. These materials will supplement the book

None
